

Diatomaceous earth (Industrial and road mineral absorbent)

S03C00

Product short description:

Multifunctional, exclusive absorbent mineral made from diatomaceous earths calcined at over 850°C, very low in moisture. This diatomaceous earth is derived from the purest minerals in their natural state. Diatomaceous earth absorbs on solid surfaces, hydrocarbons, lubricants as well as flammable, explosive, toxic and chemically active substances (acids, alkalis) and other pollutants. Absorbent powder can be used on road surfaces. Complies with standard NFP 98-190. Absorbent calcined at high ...
