

# Double Thickness Roll Hydrocarbons Reinforced Web Blue (4400\*960mm)

S01T00

## Product short description:

One-sided reinforced fleece with a very robust blue coating that does not lint or disintegrate. Designed for industrial maintenance and risk prevention, the rolls can also be used to absorb water. With an abrasion resistance far superior to conventional absorbents, you can clean tools, machined parts or position them on a work surface and walk on them. Pre-cutting of the rolls makes distribution easier, saves time and avoids waste. 1 Roll per bag
